Dimensions:

- Panels 500x700 mm and 500x1000mm (HxW)
- Self-supporting forming an "X"
- Optional 2 triangular feet 160x230mm (HxW)

To ensure compliance with the safety distance in sensitive areas, we have designed a special PMMA partition panel, consisting of two intersecting sheets which can be used in two options:

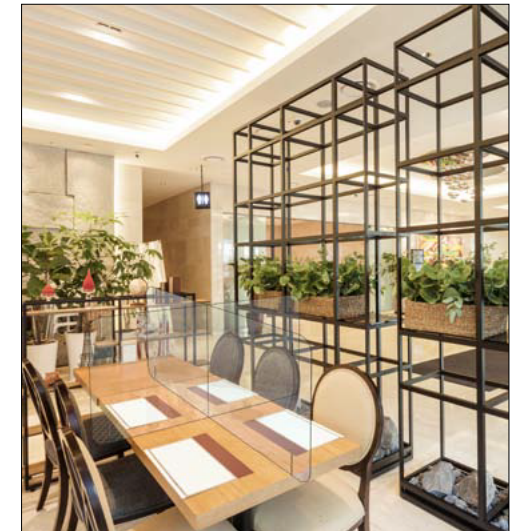

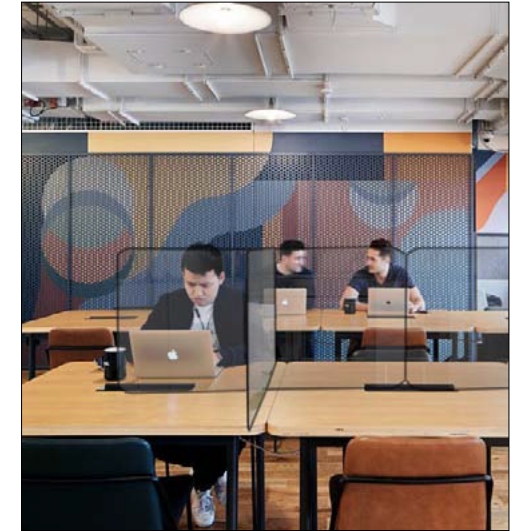

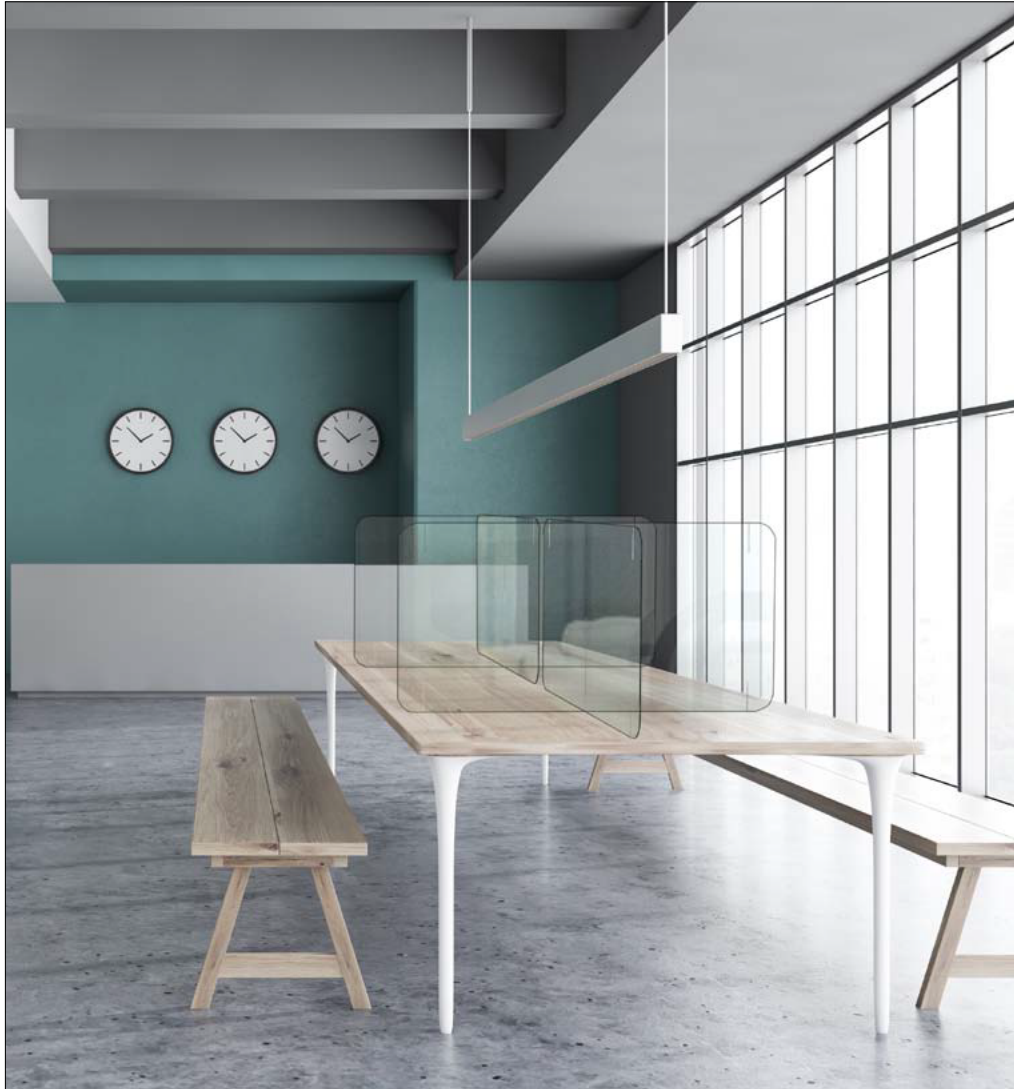

- 1: interlocking, self-supporting
- 2: with feet (optional).

Available in two sizes, 500x700mm HxW and 500x1000mm HxW, particularly suitable for environments, such as offices, restaurants and technical studios. For all compositions see image on the right.

Project prevention:

Variable panel from 4 to 8 mm with magnetic accessory

General dimensions and material description

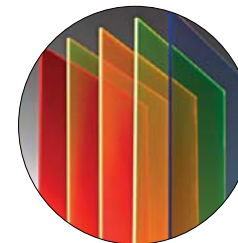

The wide range of dividers proposed by KD VISUAL also offers solutions with modern and elegant design, equipped with magnetic feet. The divider is particularly suitable for application on restaurant/bar tables or desks and receptions.

The product consists of a plexiglass plate, which is supported by 2 stable magnetic feet. The two disks are made of AISI 430 stainless steel and equipped with a double-sided adhesive foil. This way, the divider can quickly be placed on any type of surface.

Dimensions:

Panels with thickness from 4 mm up to 8 mm
Accessory plus Ø60mm base in anodized aluminium with magnets that stabilize the structure
AISI 430 stainless steel plate brushed with double-sided adhesive foil suitable for all surfaces

Project prevention:

Floor standing divider with germ shield
General dimensions and material description

Dimensions:

Structure 1500x1000mm (various sizes)
Base Ø 245mm (2 Kg)
Transparent sheet with thickness 3 mm

Do you need a divider that is easy to carry, practical and lightweight? Here is our proposal! It is a thin plexiglass partition panel, supported by two anodized aluminium profiles ending with two round bases. The structure has been designed for working environments such as hairdressing studios, barber shops and industrial environments where people have more limited space to move around. One of the peculiarities of this model is its modularity: more panels side by side together can create a partition space that guarantees greater safety to the environment.

Magnetic base

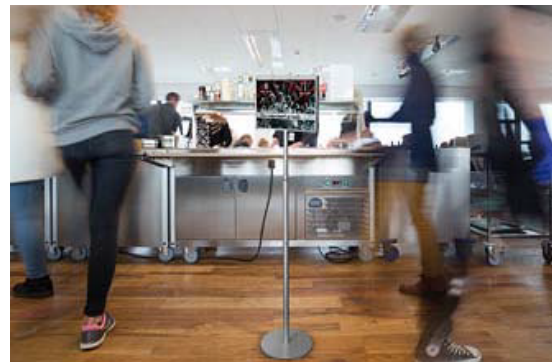

A simple, but very important action: disinfecting your hands. Presently, it is more important than ever to protect yourself and others. For this purpose, kd visual has designed an innovative sanitizing dispenser to be placed in environments with a high number of people. The peculiarity? A magnetic base, combined with a stainless-steel disc and a double-sided adhesive foil can be fixed to the ground, which gives excellent stability. In addition to the base, the post is made of anodized aluminum, a high-quality aluminum holder for dispenser and an interchangeable holder.
