LOADING BAYS PROTECTIONS

Loading bays protections are shock-proof solutions which are set up near loading doors. They avoid possible slipping, falling and flipping of moving vehicles near open and unmanned loading bays.

Sistema di protezione antiurto installato in prossimità delle porte di carico. Permettono di evitare situazioni ad alto rischio di scivolamento, caduta e ribaltamento dei mezzi in movimento in presenza di baie di carico aperte e non presidiate.

Système de protection contre les chocs installé près des portes de chargement. Ils permettent d'éviter des situations en raison du risque élevé de glissement, de chute et de basculement des véhicules en mouvement en présence de quais de chargement ouverts et sans surveillance.

La protección de muelles de carga es un sistema anticolidión que está cerca de las puertas de carga. Evitan los riesgos de deslizamiento, caída y derrocamiento los vehículos en movimiento cuando están cerca de los muelles de carga abiertos y no vigilados.

WALL PROTECTION

New bumper without guides. Thanks to its big size and resistance it is ideal for protection of industrial spaces. Fixed caps with hidden screws covered by specific buttons.

Nuovo profilo antiurto senza guida. La sua ampiezza e resistenza lo rende ideale per la protezione di ambienti industriali. Terminali fissati con viti nascoste da appositi bottoni.

Nouveau profilé anti-choc sans besoin d'une base à fixer. Sa mesure large et sa résistance en font le profilé parfait pour la protection des espaces industriels. Embouts fixés avec des vis cachées grâce à des bouchons spécifiques.

Nuevo perfil antigolpe sin guía. Su amplitud y resistencia lo hacen ideal para la protección de entornos industriales. Terminales fijados con tornillos ocultos por botones especiales.

OUR INSTALLATION

OUR INSTALLATION

MPM states that:

The safety coefficient and consequent use of the product requires preliminary screening by a designer who will necessarily have to take account of the actual installation conditions, considering that instructions contained in catalogues, orders, transport documents, invoices or any other documentation showing the product characteristics, should not be considered suitable to compensate for any lack of design or technical testing required for installation of the product.

In any case, it is necessary to comply with the appropriate assembling and installation instructions as defined in the technical catalogue on corporate websites (www.mpmprotections.com). MPM will accept no liability for the use of profiles in situations that have not been preceded by the above-mentioned checks.

Impact forces indicated in the brochure, or in other documents, refer to laboratory tests and cannot take account for consequences determined by installation modes or peculiarities of the place where the products are installed (in an operational environment vehicle type, speed and mass, routes, angles of impact, ground and anchorage are variable and uncontrolled conditions that no test can replicate); the data refers to an intact product that can be affected by alterations from incorrect maintenance and old age, as well as the methods and characteristics of installation (with specific reference to floor-mounted products like the latter); the weight, dimensions, colours and characteristics of the material refer to the sample and the conformity with the latter of the product supplied will be subject to normal production tolerance. The product may be affected by environmental installation conditions.

Protections performances can be affected in environments with temperatures below 0°C or higher than 50°C.

The fastness of the colour and its brightness depend on wear and tear and climatic conditions that can affect its intensity over time.

Images in the brochure are for advertising purposes only and do not in any way represent how the products should be used.

Full version of MPM product warranty available in the technical catalogue on corporate websites (www.mpmprotections.com).
